seBond 7

SKU: BS 70

CE 1639

One Component, Self Etch Bonding

One Component, Self Etch Bonding
seBond7 is a one component, light-curing, self etching, self conditioning 7th generation dentine/enamel adhesive/bonding system

Indications

• Bonding system for all Light Cure or Self Cure composites, compomers and ormoceres.
• For dentine and enamel. Compatible with all prevalent products.

Advantages

• Latest state of the art technology (7th generation), suitable for all prevalent composites
• Very high shear bond strength for all light or self cured restorative materials
• Easy and time saving application; Etching, priming and bonding in one step only
• No need for etching. No need for shaking or mixing
• Short working time facilitates treatment of young patients
• One coat only
• No post operative sensitivity
• Reliable depth of demineralization
• Long lasting restorations

Packaging

5m bottle, 25 Micro brushes, mixing pallet
