SKU: LX

CE 1639

Automix Temporary Crown & Bridge Material

Indications:
Temporary crowns and bridges, temporary inlays and onlays, long term temporaries and temporary veneers.

Advantages:
• exceptional flexural strength, highest pressure and abrasion resistance;
• exactly fitted and unstressed due to the slightest polymerisation shrinkage;
• minimal polymerisation temperature during setting;
• defined elastic phase for reliable removal of the provisional;
• brilliant, translucent colours for an exceptional natural aesthetic and fluorescence even in different lighting conditions;
• absolutely colour stable for complete time of wearing, biocompatible, tasteless;
• colour-stable and publishable to a high shine, providing for a natural aesthetic. Its colouration can be individually adjusted, compatible with UV-light-polymerising composites;
• low polymerisation temperatures prevent pulpal and gingival irritation and damage;
• for direct application in Automix2 cartridge system, ideal mixing ratio of 10 : 1;

Contents:
Cartridge 50ml/76gm, 10 mixing tips blue. Available in shades A 1, A2, A3, A3.5 and B1
